About Seedify V2

- Seedify V2 is a Blockchain Gaming focused **Metaverse, Metaverse Studio** and **NFT Marketplace**.
- It is under development and will be listed as \$SNFTS on Pancakeswap, which is a decentralized exchange on the Binance Smart Chain.
- Seedify V2 will host some of the best **INOs** and **IMOs** and a gaming and metaverse asset centric marketplace designed to address the shortcomings of traditional NFT marketplaces with UI integrations and research tools that simplify the process of buying and selling gaming or metaverse utility NFTs.

Immanent Solutions is Seedify's **exclusive software development partner** and is building Seedify V2 for them.

Challenges

Seedify team wanted to offer something unique to Blockchain community in the NFT and Metaverse space and approached Immanent with a set of unique challenges :-

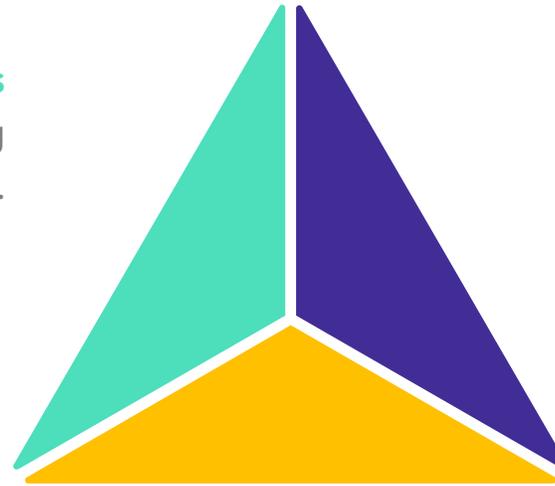

- Existing NFT and Metaverse studios were fairly generalist. Seedify wanted to build something laser focused and high on quality.
- Seedify **did not want to raise any capital funding** whatsoever and stay bootstrapped. However, they were very keen on offering grants to enterprising creators
- They were open to innovation and new idea development around NFT, NFT Marketplace and Metaverse space.

The Approach

01

Provide gamers intuitive research tools
to get just the NFTs they need for gaming
and metaverse experiences.

02

Reward users with NFT collectibles,
while also adding a new \$SNFTS token,
which will be airdropped to \$SFUND
stakers/farmers, along with holders of
NFTs from **selected** blue-chip
collections and partners.

03

Connect creators and supporters
through a “Kickstarter” like crowdfunding platform.

The Solution

Immanent helped Seedify launch Seedify Meta Studios,
an in-house Metaverse creation studio.

Immanent helped Seedify launch Seedify NFT Launchpad
for launching in-game and metaverse NFTs (INOs and IMOs).

Immanent helped Seedify launch Seedify Metaverse Asset Program
for providing grants to deserving, enterprising creators.

Immanent helped Seedify launch Seedify NFT Space
- a revolutionary gaming and metaverse asset centric marketplace, that aims to fill the void left by traditional NFT marketplaces which lack the ability and UI to properly support buyers and sellers of these certain utility assets dedicated towards gaming and the metaverse.

The Tech Stack

Immanent used following technologies for designing and developing the entire infrastructure and platform for Seedify V2.

The Outcome

Due to consistent and high quality Blockchain technical advice and consulting offered by Immanent to Seedify team, they have now grown from a community launch project to an industry leader, with:

Seedify is now ready to launch its V2 with us

including following features being designed and developed by Immanent -

- 01 Seedify Meta Studios** for in-house projects
- 02 Seedify NFT Launchpad** for launching in-game and metaverse NFTs (INOs and IMOs)
- 03 Seedify Metaverse Asset Program** for providing grants
- 04 Seedify NFT Space** which will connect all our innovations, as a master product and a gaming focused marketplace.

◆ App in Action ◆

The screenshot displays the Seedify app interface with a purple header. The header includes the Seedify logo, a search bar with the text "Search for a NFT or collection", and navigation links for "Home", "Explore", "FAQ", and "Profile". A "Connect Wallet" button and a user profile icon are also present in the header.

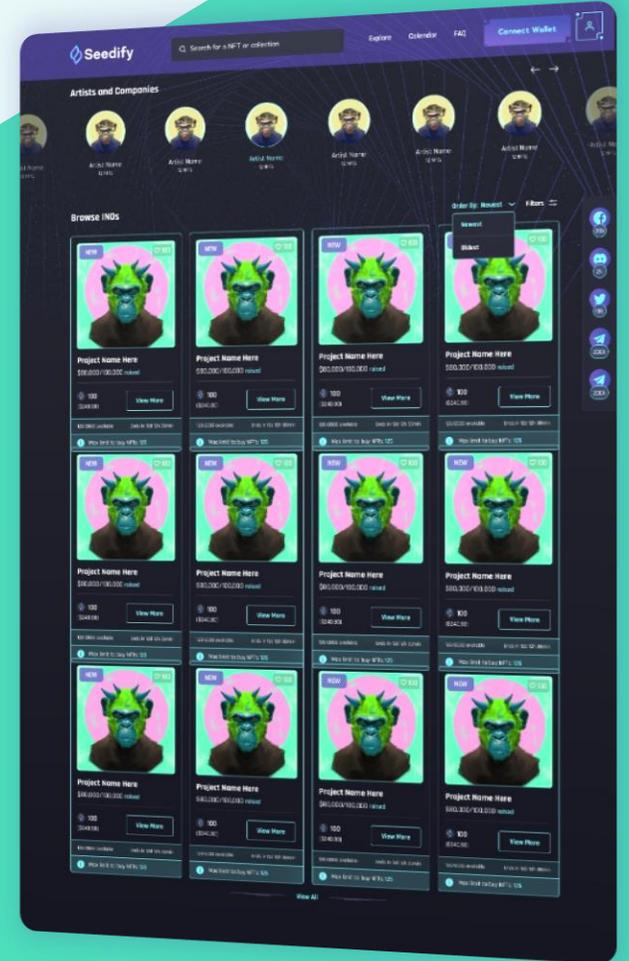

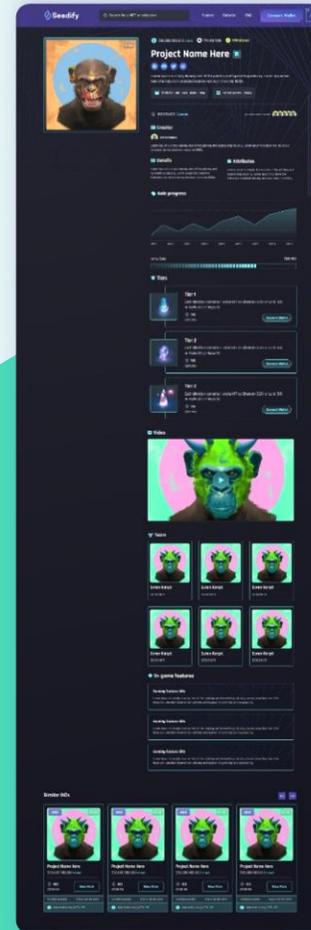

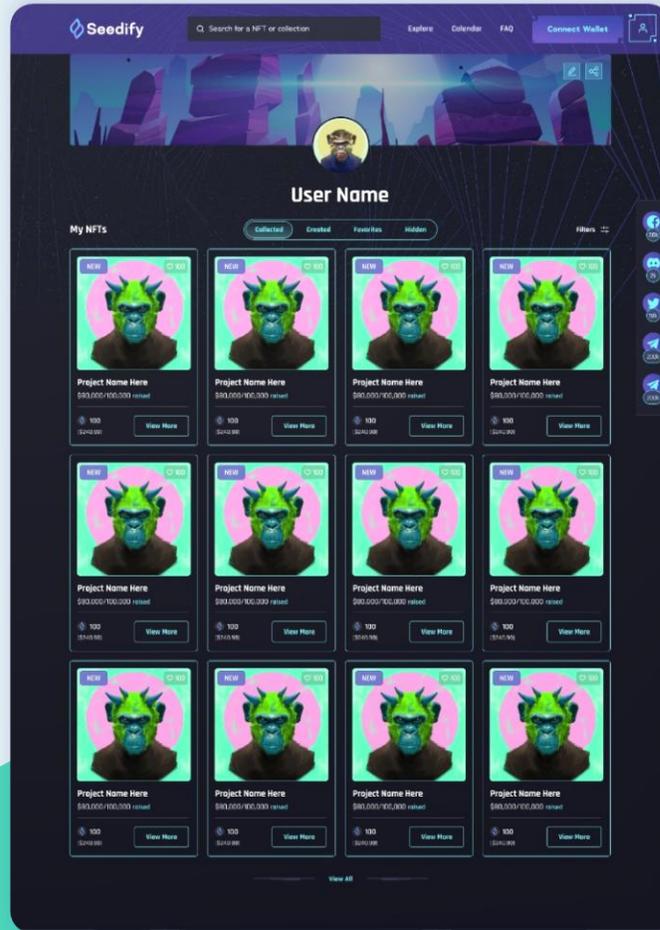

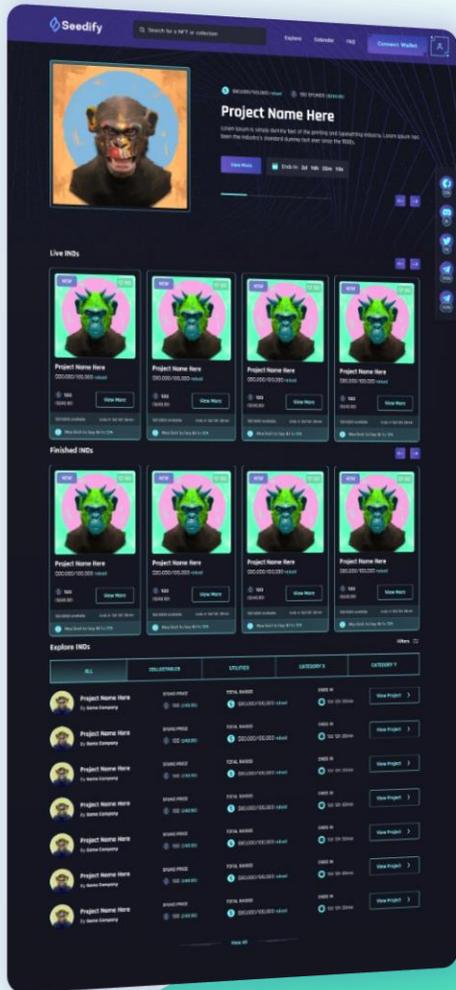

The main content area features four NFT listings, each with a "New" badge and a heart icon with a "0" count:

- Listing 1:** "COPYFIGHT" - Humanoid Robot. 0/200 BUSD raised. Price: 2 BUSD. 100/100 available. Ends in 0d 17h 20min.
- Listing 2:** "COPYFIGHT" - Laser Gun. 0/200 BUSD raised. Price: 2 BUSD. 100/100 available. Ends in 0d 17h 20min.
- Listing 3:** "COPYFIGHT" - Electric Gun. 0/200 BUSD raised. Price: 2 BUSD. 100/100 available. Ends in 0d 17h 20min.
- Listing 4:** "Drunken Robots" - BOB. 0/200 BUSD raised. Price: 2 BUSD. 100/100 available. Ends in 0d 17h 20min.

Each listing includes a "View More" button and a footer note: "Max limit to buy NFTs: 0".

On the right side of the app, there is a vertical stack of social media sharing icons: Facebook (9k), Twitter (651.1K), and Telegram (214.9k). A chat bubble icon is also visible at the bottom right.
